

Learning FLEXnet AdminStudio

This 4 day course will provide you with a hands-on environment where you will gain the skills needed to repackage traditional setups into MSIs and rapidly customize them using FLEXnet AdminStudio. Plus you will gain experience in creating transforms and also identifying and resolving component conflicts before deploying your applications.

Learn How To

- Use AdminStudio's **Process Workflow** tool to create workflows to track and manage any pre-deployment process.
- Use AdminStudio's **Repackager** to convert traditional setups to Windows Installer setups.
- Use AdminStudio's **Authoring Environment** to enhance repackaged setups, modify existing MSIs, and correct validation errors.
- Use AdminStudio's **ConflictSolver** to identify and resolve potential conflicts between Windows Installer setups before deployment into your desktop environment.
- Use AdminStudio's **Tuner** to customize the installation of existing Windows Installer setups - including 3rd party installations, to meet company-specific requirements.

Prerequisites

You will be given a structured process to adhere to when repackaging to ensure the creation of robust MSI packages that function correctly and are compliant with Microsoft guidelines. The emphasis will be on providing practical, real-world experience and students are encouraged to bring a small application (not to exceed 5MB) to repackage during the class (applications will be provided for those who cannot bring one).

Leave Class With:

- Knowledge about the FLEXnet AdminStudio product
- Skills to use FLEXnet AdminStudio
- FLEXnet AdminStudio course syllabus

About the trainer:

The instructor enjoys an extensive FLEXnet AdminStudio/MSI programming background and is an InstallShield Certified Trainer.

Your investment:

€2.249,00 per student including licensed course material, daily lunch&refreshments. Not including VAT.

Duration:

4 days from 09.00am until 4.30 / 5.00pm.

Registration:

By fax or online on www.pds-site.com/training/

Schedule:

pls contact PDS / check www.pds-site.com/training/
