

madcap
BLAZE™

Who Needs MadCap Blaze?

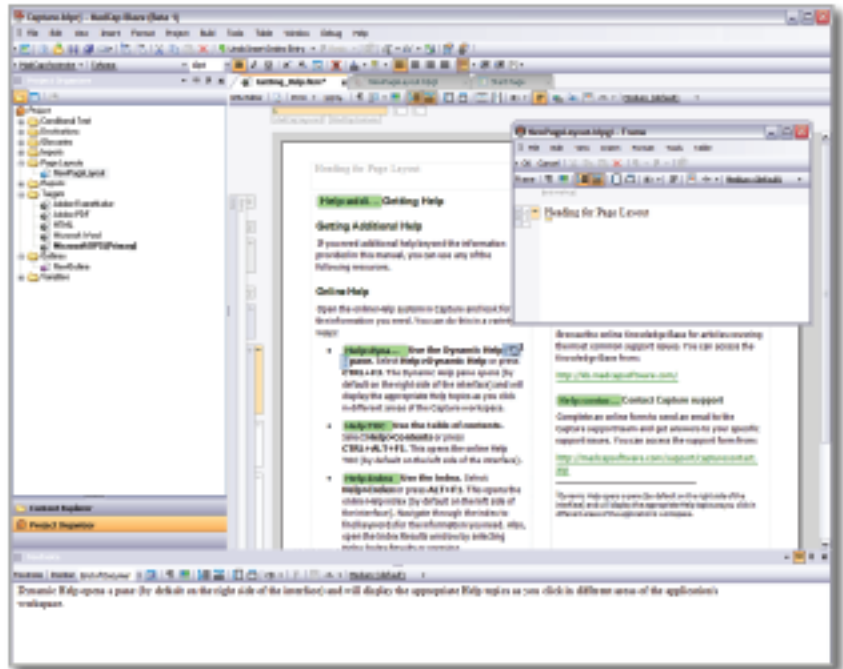

MadCap Blaze is designed for any writer who needs a cutting-edge application for producing very long documents that is flexible, easy to learn, and makes the most of the latest technological advances. MadCap Blaze is ideal for Adobe® FrameMaker® users who yearn for a better solution. It is also great for Microsoft® Word™ users who need more power for long documents but want an easier program than FrameMaker®.

With MadCap Blaze, writers can easily compose content in our unique patent pending visual editor, with all of the reuse and flexibility of the XML format. Since no knowledge of XML is required, Blaze lets writers focus on creating content and keep pace with the industry evolution to XML without learning any programming.

What is MadCap Blaze?

MadCap Blaze, quite simply, is the answer to Adobe® FrameMaker®. Blaze is the ideal solution for easily producing very long documents for print—such as books, manuals, and illustrated guides—using cutting-edge, future-proof solutions. Blaze can handle the same tasks as FrameMaker, but lets users work in a much easier interface, enjoy more flexibility, and leverage the latest breakthroughs in information technology.

Features:

XML Support

- Pure XML content creation
- All project files XML-based
